

Production miller JTJ-9

Vapo's production millers have several designs of blades, which produces a fast drying milled layer. The millers are suitable for all types of peat, and they can be easily set up for the particular production conditions that may be encountered. Large rubber tyres in front of the milling drums make the machine

easy to tow. Servicing is facilitated by a central lubrication system, and a robust transmission system guarantees reliable operation. Vapo's production millers are ideally suited for use in the multi-harvest method.

Technical data

Tractor type	4-wheel drive agricultural tractor
Required engine output	80-110 kW
Capacity	4-6 ha/h (160-240 compacted m ³ /h)
Working width	JTJ-9 8.4 m
Weight	JTJ-9 2600 kg
Mounting	towing hook
P.T.O.	1000 rpm
Required hydraulic outlets	1 pc, 2-action, 1/2"
