

Milled peat loader JKS-20

The JKS-20 milled peat loader has been designed for loading and transferring peat. Due to a transfer distance of 20 metres in addition to loading, JKS-20 can be used to move peat from one field to another. Loader can also be used to make a so-called PECO stockpile. The transfer distance allows peat to be moved from wet fields to fields with a better bearing capacity for improved loading. The milled peat loader can also be equipped with a sod peat screening capability. The transfer distance and sod peat accessory make the JKS-20 a very versatile and effective machine for transferring and loading peat.

Technical data

Tractor type	4-wheel drive agricultural tractor
Required engine output	100 kW
Capacity	3200 m ³ /h (momentary)
Working speed	0-8 km/h
Weight	10000 kg
Dimensions	length 6600 mm width 28000 mm height 5000 mm
Loading height	up to 5000 mm
Mounting	towing hook
P.T.O.	1000 rpm
Required hydraulic outlets	1 pc, 2-action, 1/2"

P.O.BOX 22, FI-40101 JYVÄSKYLÄ
