

Sod peat harrow PPK-19

The PPK-19 has been developed for ease of handling. It produces consistent results, effectively turning the sods each time it is used.

The harrow can be mounted on the hydraulic lifting system and then it only has to be lowered onto its wheels to be ready to use.

Technical data

Tractor type	4-wheel drive agricultural tractor
Capacity	10-20 ha/h
Working width	18 m
Weight	approx. 1500 kg
Mounting	lifting arms
